Acoustical Nets

Work Zone Dividers

Geo Tiles

Baffle Clouds

Tack Panels

Acoustical components offer dramatic yet functional design potential. This diverse textile enables architects & designers the ability to redefine, reinvent & reconfigure office furniture & environments. A 100% polyester material made from 40-50% recycled water/soda bottles is: tackable, decorative, sound dampening, impact/bacteria/moisture resistant, easy to install & cost-effective.

GRAPHIC IMPRESSIONS

This versatile graphic messaging system utilizes dye sublimated printed fabric

with a silicone edge membrane, that easily attaches to an aluminum frame. Your images can be changed in minutes, used as often as desired & can be machine washed.

A quite zone for open plan workplaces. Standard options include: adjustable fan & ventilation, acoustic interior walls & ceiling, LED lighting, power/ data & more.
