CLIENT TESTIMONIAL

"As a growth company with a relatively young employee base, we strive to provide a fun and flexible work space and were seeking a building partner who could help us achieve that. Kevin and his team really listened to us and rose to the challenge of delivering the kind of office environment we always envisioned for our employees! For a marketing research company, our 'digs' are both functional...and cool!"

— ANNE TULLY, Vice President, Finance & Administration, Gongos Research

Primeway collaborated with a local furniture dealer and Gongos Research to identify and understand the needs and vision of the new space.

With this in mind, Primeway provided a flexible, functional and dynamic solution for the new Gongos interior.

To create an initial sense of arrival, a custom reception area was developed using a mix of light and dark laminates accented with brushed aluminum standoffs.

In addition, several custom-sized worktops were built to create informal meeting areas.

Custom café tables, beverage areas and mailroom cabinetry rounded out the project.

MAKING YOUR WORKING ENVIRONMENT WORK
